I am buying a substantial amount of [@Tesla](#) shares. Here is why:

- ➡ is the most innovative & product-focused company
- ➡ vision is for the next 5-10 years, while valuation is affected by short term financial results
- ➡ 3 new models will be released in 2020 (Y, truck, roadster)

- ➡ stocks value seems to be low atm
- ➡ price/quality ratio wise there is no real competitor in electric cars space
- ➡ Electric space only gonna grow for next 3-5 decades
- ➡ Tesla is keeping increasing competitive advantage (custom ai hardware, batteries tech, charger network)

- ➡ If autopilot actually works and get regulated - that is at least 3-5x bonus multiplier on the investment
- ➡ Elon times and times again prove that impossible is possible both technologically and legally

Replying to [@ethmarek](#) [@Tesla](#)  
buy [@CDPROJEKTRED\\_IR](#) instead :D
